HELPY OOPS

GIFT FOR LOVED ONES

Health care, Family's peace-of-mind, workers' safety

DESIGNED FOR

DESIGNED FOR YOU AND ALL YOUR FAMILY

Helpy Oops is the emergency device with functions specifically developed to let **children play and have fun in complete safety**, even when they are away from home. At the same time it can provide security to the **mom** at home alone or to the **grandpa** going to buy the newspaper: **all for one, one for all!**

PERFECT FOR ELDERLY AND PEOPLE WITH IMPAIRMENT

Older people who want to maintain their independence and **autonomy** deserve to live their days in **complete safety**. With its functions, Helpy Oops is the remote alert device designed for their peace of mind, and that of their loved ones.

A SAFE FRIEND ON WORK PLACES

In construction sites, factories and everywhere in the workplace, safety has to be a priority. **Helpy Oops** as medical alert device is the perfect solution. With its functions, Helpy Oops helps to prevent work hazards and **provides workers with a Personal Protective Equipment**.

ALL IN ONE

Multiple functions in a single device

WHY CHOOSE IT?

WHY IS IT BETTER THAN A SMARTPHONE?

In a dangerous situation or if unable to find or digit a telephone number, with **Helpy oops it's easier**: just by pressing **a button** it allows to **talk and listen in hands-free mode**. You can answers up to **12 numbers** in its phonebook; Helpy Oops calls them one by one until some one answers the call.

WHY IS IT BETTER THAN A LIFESAVING DEVICE?

Traditional lifesaving devices are capable of sending out a distress call, but how many of them provide simultaneously the **man down detection function**, the **GSP tracker** and the **hands-free communication** just by pressing a button?
Helpy Oops gives you all this and much more.

WHY IS IT BETTER THAN GPS TRACKER?

Helpy Oops, like many other devices, has a built-in GPS but thanks to the **APP allows to**:
> Locate the **exact position** of the device
> Receive a **notification** if the end user comes **in or out of a geographic area**
> Establish an **hands-free call** with the user
> **Connect remotely** from your own smartphone

FUNCTIONS AND NEWS

The compact and easy-to-use GSM, GPRS and GPS remote alert system

A FLEXIBLE AND COMPLETE TECHNOLOGY

RESCUE CALLS

With Helpy Oops you can send **emergency calls to up to 12 numbers** simply by pressing a button.

FALL DETECTION

Special motion sensors allow Helpy Oops to **send automatic emergency calls** when an **accidental fall occurs**.
Algorithm developed in cooperation with UNIVPM, Department of Information Engineering

LOW SIM CREDIT

The device **sends a notification** when the SIM credit is expiring.

POSITION DETECTION AND GEOFENCING

Through the **GPS signal**, it is possible to constantly locate the device. It is also possible to set some **geographical safety areas** and receive a text message if the user is out of range.

LOW BATTERY NOTIFICATION

Helpy Oops gives an **audible signal and sends a text message** when the battery is low.

PHONE FUNCTION

With Helpy Oops you can **receive and make hands-free calls** automatically or by pressing a button.
Helpy Oops is compatible with **multi-carrier SIM cards**, ensuring **full coverage** with the utmost reliability.

MOTION ABSENCE FUNCTION

With the **MAN DOWN function**, Helpy Oops sends an alarm or a SMS if the device stays still for a programmable period of time. A notification will be sent also in case of resumed movement.

APP - WEBAPP

Thanks to the brand-new APP you can **program and manage** your Helpy Oops **directly from your smartphone or PC** in an extremely easy way.

SELF-DIAGNOSTICS SMS

Helpy Oops can be **programmed to send a periodic text message** to inform you about the **correct operation status**.

REMOTE - CENTER COMMUNICATION

The device can be **managed** through **service centers** or surveillance operation centers.

ANTIBURGLAR FUNCTION

Helpy Oops can be **placed in your new car** or hidden togheter with your valuables: in case of burglary, thanks to the GPS, you will be able to **locate** the stolen items or **activate a silent alarm** by pressing the emergency button.

ROOM MONITORING

Helpy oops allows you to **connect remotely** from your smartphone and **monitor the environment**.

IT'S EASY WITH THE APP...

Available for Android and iOS
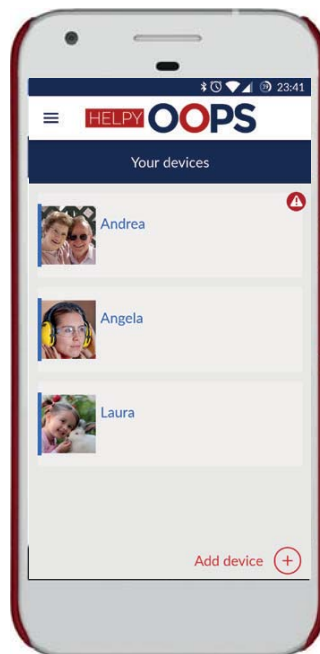

A SIMPLE AND INTUITIVE MANAGEMENT

The latest innovation for Helpy oops is the **APP making the device management** affordable to everyone.
The App, **completely free of charge**, can be used both from your smartphone and **your PC** to program and customize your Helpy Oops according to your needs.
The main functions of the APP:

1. **DEVICES**
2. **MAIN PAGE**
3. **ALERTS**
4. **CALL**
5. **MAPS**
6. **MANAGEMENT**

1. DEVICES: displaying all connected Helpy Oops devices to select the desired one

2. MAIN PAGE: showing all the actions you can perform remotely on your Helpy Oops

**3. ALERTS:** showing a comprehensive events log

... ALSO FROM PC !!

*With the Web App you can manage the device directly from your PC*

4. CALLS: allows to call the device directly from the smartphone

5. MAPS: shows the positions' log, the geofencing area and on-demand tracking

6. MANAGEMENT: here you can modify Helpy Oops settings (phonebook, geofencing, calls, etc.)

MOBILE SMARTPHONE - TABLET
